ratlr.promptmetric

C PointwiseMetric

- «Create» PointwiseMetric(ModuleConfiguration,Classifier)
- List<Double> getMetric(List<String>,List<ClassificationTask>)
- Double getMetric(String,List<ClassificationTask>)
- String getName()

ratlr.promptmetric.reductor

I *Reductor*

- ▲ double reduce(Collection<Double>)
- ▲ String getName()

C MeanReductor

- «Create» MeanReductor()
- double reduce(Collection<Double>)
- String getName()

ratlr.promptmetric.scorer

I *Scorer*

- ▲ List<Double> score(List<ClassificationTask>,List<ClassificationResult>)
- ▲ double score(ClassificationTask,ClassificationResult)
- ▲ double score(ClassificationTask)
- ▲ String getName()

C BinaryScorer

- «Create» BinaryScorer()
- List<Double> score(List<ClassificationTask>,List<ClassificationResult>)
- double score(ClassificationTask,ClassificationResult)
- double score(ClassificationTask)
- String getName()
